

Online Training course # 1 on “Geotechnical Investigations and Construction Material Characterization”, 19 - 20 August, 2020

CSMRS has been conducting training programmes for disseminating the knowledge and sharing the experiences gained by CSMRS in handling the various projects every year. Due to the present COVID–19 situation, it is proposed to conduct webinar series for sharing the experiences of CSMRS. The first online training course # 1 on “Geotechnical Investigations and Construction Material Characterization” was conducted by CSMRS during 19 - 20 August, 2020.

Shri S. L. Gupta, Director, CSMRS inaugurated the webinar series and presented the activities and strengths of CSMRS to the participants. The following lectures were delivered during the first training course.

SI. No.	Topic	Speaker
1	Geotechnical investigations – Need and Approach	Dr. R. Chitra, Sc. ‘E’
2	Deformability Characteristics of Rock and Rock Mass	Shri Hari Dev, Sc.‘E’
3	Suitability of construction materials for concrete structures	Sh. U.S. Vidyarthi, Sc.‘E’

The online training course was attended by more than 90 participants including practicing engineers and geologists and other professionals working in central/state government, Public Sector Enterprises, private organizations, academicians, researchers/students pursuing PhD/PG/UG courses etc. The participating organizations include CWC, WAPCOS, CWPRS, NHPC, SJVN, GSI, THDC, Polavaram Irrigation Project, UJVNL, UP PWD, DRDO, CSIR, RITES, NIRM, Sardar Sarovar Narmada Nigam, L&T, JSW Energy, RVNL, NTPC, SMEC, Kerala Disaster Management Authority, Patel Engineering, IITs, NITs, faculty and students from government/private engineering colleges etc.
